

# SHELTER INSTALLATION GUIDE

*Read each step before you attempt set-up.*

**Step 1** - Place the shelter in the center of the area that you want to be sheltered and remove the cover. Have 2 people stand on opposite sides, grasp two outer legs each and lift off the ground while gently stepping backwards to open the shelter. Stop when at arms length. **(Fig. 1)**

**Step 2** - Grasp the bottom of the diamond **(Fig. 2)** on opposite sides. Again, lift up and gently step backwards until the shelter is fully opened.

**NOTE:** Be careful not to trap your fingers.

**Step 3** - Engage the auto slide at each corner by pushing up with one hand while holding down the top of the leg with the other hand. The snap button will engage in the groove. Repeat this step on all 4 legs. **(Fig. 3)**

**Step 4** - Lift two adjacent outer legs up and pull out the inner snap locks. Repeat on all 4 legs. Raise or level the shelter using the adjustment holes found near the bottom of each outer leg. **(Fig. 4)**

## ⚠ WARNING

- Use stake kit or weight bag set in windy conditions. The shelter must be taken down if the wind becomes heavy.
- Do not leave the shelter unattended in rain or windy conditions.
- If the shelter becomes wet, let the shelter dry before closing.
- To clean the shelter, use a mild detergent and water.

# TAKE THE SHELTER DOWN

*Read each step before you attempt set-up.*

**Step 1** - Have 2 people slightly lift adjacent outer legs, depress the snap button and telescope the inner legs up into the outer legs. Repeat on all legs. **(Fig. 5)**

**Step 2** - Release the auto slide at each corner by pushing the snap button to release pressure on slider. Repeat on all 4 corners. **(Fig. 6)**

**Step 3** - Grasp the top of the diamond on opposite sides, lift up, gently shake the shelter while stepping forwards until it is 3/4 closed. Then grasp the two outer legs and push the shelter together until fully closed. **(Fig. 7)**

**NOTE:** Be careful not to trap your fingers.
